

Name: Soy Sin

Answer (Final exam)

1. The best scientific sources are all the sources that provide true information such as

- Books: all books that help publisher, author, year of publish...
- Journal: have author, year, publisher, year of publish...

We will choose scientific sources because all information in these sources don't have problem for us and it understand from a lot of people.

2. As a future professional in research institution, the importance of accountability of my research outputs are:

- Responsibility of research outputs
- All information in research outputs is true and have the exact source
- Flow role research
- Protect all information of my accountability
- Share research outputs to help other people
